V3Travel System

Features for Polling Partner

Take Control

The V3travel System provides the opportunity for Product Providers or aggregators to utilise their existing reservation system/booking engine to deliver up their rooms live to as many distributors as they want to choose, for customers to search, book and pay on-line quickly and simply.

Currently the V3Travel System provides the opportunity to access over 100 Distributors. You can set your own retail price, opt in or out of any Distributor at any time, and agree or not to specified Distributor commission rates.

It means a reduction in the time consuming manual process of allocating to the multitude of distributors and third party intermediaries and double handling.

For your marketing it means more customers can find and buy your inventory on more Distributors without you having to tie up rooms through allocations.

At last you can take control of where your products are sold at what price and at what commission.

Take Control Advantages

The following features are available to Polling Partners:

- Ability to integrate your reservation system once to the V3Travel System and Distributors automatically gain access to your product base.
- Ability to opt-in and opt-out from Distributors.
- Ability to give individual properties/owners their own user access to self manage opt-in and opt-out process.
- Management reports and the ability to export transaction logs.
- Choice of full or partial integration approaches.
- Depending on the Distributors selected method of payment, the funds will either be deposited directly into the your account (direct booking) or the funds will be kept by the Distributor (on account) and settled monthly.

Features for Polling Partners

Take control of your Integration

Full Integration:

The Polling Partner web services enable the following:

- Provider availability.
- Provider's product availability.
- Reservation.
- Cancellation.
- Confirmation.

This allows distributors to maintain their branded consumer booking experience with fees only charged on confirmed bookings.

Partial Integration:

The Polling Partner web services enabling the following:

- Provider availability.
- Provider's product availability.

In addition to the above a Partially Integrated Polling Partner needs to provide a deep link URL allowing consumer browsers to

This document includes information that is confidential to Vcubed Pty Limited and eviivo Limited and that is not in the public domain. redirect directly into the Polling Partner's booking process without the need to search again.

This allows branding of the consumer booking experience to be derived from the Polling Partner's system and fees are charged on each referral regardless if a successful booking was made.

Take Control of your Management

A secure extranet is available which provides access to the following features:

- Manage business details.
- Manage user access rights.
- Manage provider business details.
- Manage provider - distributor opt in process.
- Option to provide provider's to self manage their own opt in process.
- View online booking reports or export transaction in XML.

Features for Polling Partners

Can you really afford to leave the management of your online distribution and pricing to third parties? At last you can take full control.

Pricing

Fees are only payable when a booking is made or confirmed. To find out how affordable this service is call Stephen Wells on +61 (2) 9287 2126 or email to swells@v3leisure.com now.
